

— CINEMA DESIGN PROPOSAL

15 Harrop Rd, Hale

by Sonor

PREPARED FOR

Andrew Bell

PROJECT

15 Harrop Rd, Hale

REFERENCE

SNR-CD-260724-K5VQ

DARK BLUE

15 Harrop Rd, Hale

A dedicated home cinema, designed as one system – picture, sound, acoustics, lighting and interior finishes engineered together. This proposal sets out the design specification for your room; commercials follow on the formal quotation.

ROOM

5,180 mm × 5,230 mm × 2,300 mm high

PERFORMANCE TARGET

CEDIA RP22 · Level 2

SEATING

Como · 2×4 · Ocean

DESIGN DIRECTION

Dark Blue – Deep navy walls and cabinetry, brass accents, warm halo light – boutique cinema bar feel.

CEILING

Star Ceiling – see Star Ceiling section

TIERED SEATING

Flat floor

LIGHTING

Orluna downlights · 3 LED zones

DISPLAY

Projector · acoustically transparent screen · speakers concealed behind

AUDIO

5.1.4 immersive audio

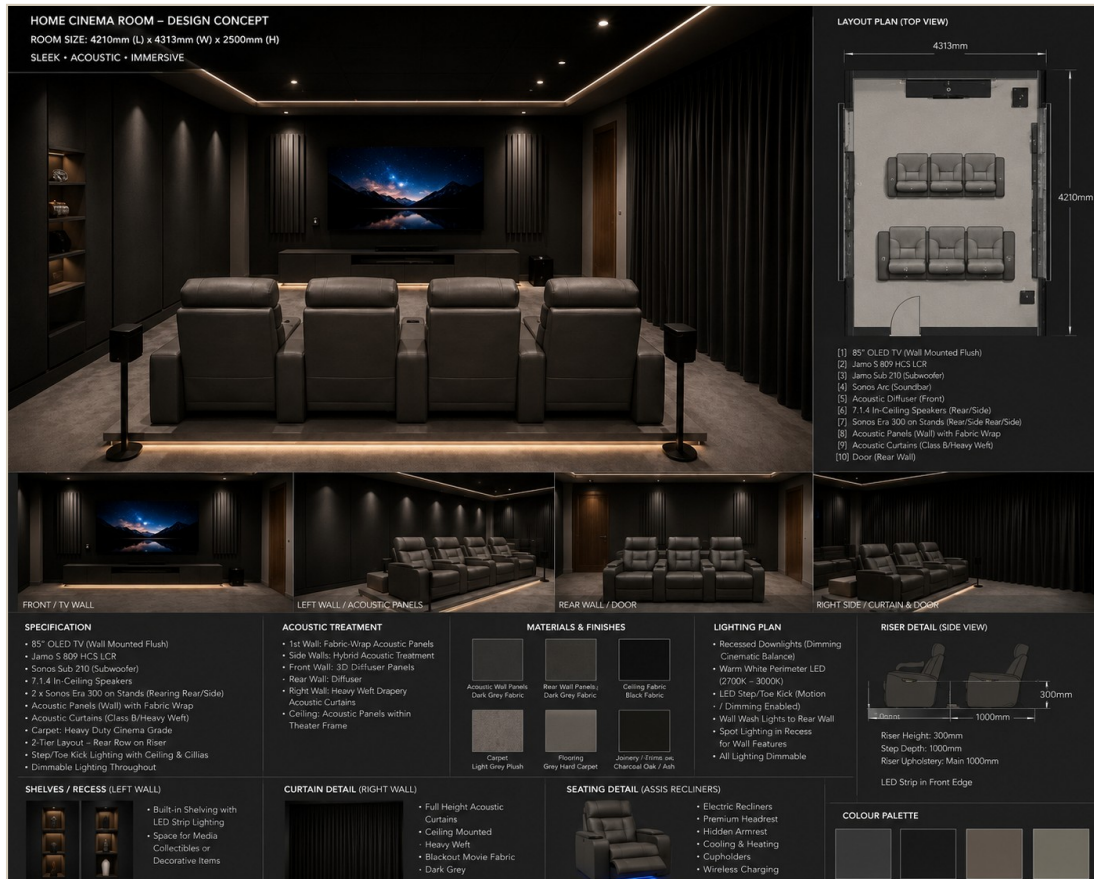

IN THIS PROPOSAL

- MK Sound
- The detail

DARK BLUE

Design concepts

Concept renders for the scheme – these set the direction and feel of the room. They are visual intent, not construction drawings; the technical plans govern the build.

CLIENT CONCEPT BOARD – ORIGINAL MOOD

CINEMA BAR CONCEPT – DARK BLUE SCHEME

CLIENT CONCEPT – CINEMA ROOM RENDERS

DARK BLUE

Materials & finishes

One pick per surface from the Sonor aesthetic library. Physical samples are provided for approval before any order is placed – photographic reproduction and fabric batches can vary.

PROJECT PALETTE

**Midnight Navy**

#242E3D

Derived from the hallway bar concept render.

**Ink Cabinet**

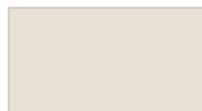

#1A2130

**Aged Brass**

#A8894F

**Warm Oak**

#8A6743

**Stone White**

#E8E2D6

**Charcoal**

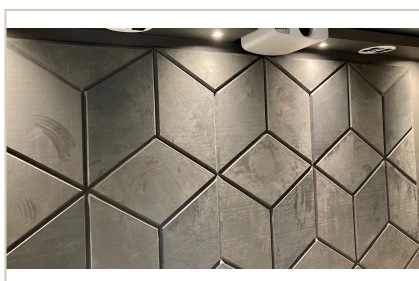

#2E3138

WALL FABRIC

Midnight Blue

Deep blue feature colour – dark blue sch...

ACOUSTIC PANELS

Diamond Acoustic Design Pane...

Cineca

CARPET

Navy Plush

Deep-pile navy – dark blue schemes

CURTAIN

Velvet – Midnight Navy

Navy velvet drape – dark blue schemes

JOINERY

Navy Shaker + Brass

Navy cabinetry with brass hardware – ci...

Physical samples of every surface are approved before any order is placed.

THE FULL PICTURE

Design scope

Everything in scope for the room build – chosen from the Sonor design library and confirmed with this proposal. Free-form detail is carried in the joinery notes.

PROJECTION SCREEN

- **Fixed-frame (woven AT)**

FRONT WALL BUILD

- **AT fabric speaker wall**

WALL TREATMENT

- **Full fabric-wrapped walls**

ACOUSTIC TREATMENT

- **First-reflection absorbers**
- **Bass traps**

CABINETS

- **Media wall / bar unit**
- **AV rack cupboard**

CONTROL SYSTEM

- **Control4 scenes**

NOT IN THIS SPECIFICATION

Tiered seating · Wall lights / sconces – not specified for this room. Available as design options on request.

WARM · CALM · PREMIUM

Lighting design

Warm white (2700K) throughout, every circuit dimmable via Rako scenes. Lighting is layered – architectural downlights, concealed linear LED and feature accents – so the room moves from welcome to full blackout in one press.

FITTINGS

- **Recessed Downlights · 8 fittings** Orluna · High-end
- **Picture / Poster Lights** Over framed artwork

Downlight grade: Orluna (High-end) – High-end trimless / adjustable

SCENES

Welcome	Perimeter ~70% · downlights ~40% · riser on
Film	Main lights out · low riser glow · optional 5–10% perimeter
Intermission	Perimeter ~30% · riser + shelf lighting on
Cleaning	Everything 100%

CONCEALED LINEAR LIGHT

LED lighting

Concealed linear LED provides the glow that gives a cinema its depth. Every run is hidden in a recess or cove – the light is seen, the source never is. Warm white, dimmable to 1%, no RGB.

LED ZONES

• Cove	Bulkhead / ceiling cove
• Backlit movie posters	Illuminated poster frames
• Screen wall wash	Bias light behind screen

All circuits individually dimmed via the Rako lighting scenes.

FIBRE-OPTIC NIGHT SKY

Star ceiling

A fibre-optic star field brings the ceiling to life without a single visible fitting – invisible by day, a night sky at the touch of a scene.

STAR FIELD

Fibre-optic star panels • 1000 mm panel module

LOCATION

Set into the ceiling recess, over the seating area

CEILING RECESS

300 mm drop • 600 mm perimeter ring

EFFECT

Twinkle and intensity dimmable within the lighting scenes

DOWNLIGHTS

8 recessed downlights integrated in the perimeter ring

THE FINISHING KIT

Joinery & sundries

Cabinetry intent and the accessories that make the room feel finished on day one.

JOINERY & CABINETRY

Navy shaker media wall with aged brass hardware; concealed AV rack cupboard; backlit poster niches either side of the door.

SUNDRIES & ACCESSORIES

- **Popcorn machine**
- **Side / lounge tables**
- **Drinks fridge**
- **Framed backlit posters**

REFERENCE PICTURE

VIDEO · SILVER

Video system

A reference-grade picture is engineered, not just bought: image size, mounting height and seating distance are set together to the SMPTE and CEDIA viewing-angle recommendations, so 4K HDR material resolves full detail with no visible pixel structure and no neck strain from any seat.

VIDEO GRADE

Silver – Flagship TV or lamp-free 4K laser projector

DISPLAY

Projector · acoustically transparent screen · speakers concealed behind

IMAGE SIZE

2,214 mm × 1,245 mm · 100" diagonal

IMAGE BOTTOM (AFL)

500 mm

VIEWING DISTANCE (MLP)

3,500 mm · 2.8× picture height

CONTENT MASTERING

4K HDR

PROJECTOR

JVC DLA-NZ500

IMMERSIVE SOUND

SPEAKERS · SILVER

ELECTRONICS · SILVER

Audio system

Dolby Atmos places sound as objects in three-dimensional space – a bed of speakers around the room plus height channels above. The layout below is engineered to the CEDIA/CTA RP22 recommended practice: every channel is aimed at the listening area, matched in level and distance, then calibrated in-room on commissioning.

LOUDSPEAKER GRADE

Silver – M&K Sound monitor-grade package

ELECTRONICS GRADE

Silver – Flagship Yamaha AVENTAGE receiver

CONFIGURATION

5.1.4 immersive audio

CHANNELS REQUIRED

9 amplified speaker channels (5 bed + 4 height) + LFE – processing and amplification sized for 5.1.4 or larger

MAIN LISTENING POSITION

3,500 mm from the screen wall

EAR HEIGHT (REFERENCE)

1,200 mm

LOUDSPEAKERS

Front L + R	2 × M&K Sound IW950
Centre	1 × M&K Sound IW950
Surrounds	2 × M&K Sound M40T
Atmos heights	4 × M&K Sound IC65
Subwoofers	1 × M&K Sound V12

ELECTRONICS

Processor / receiver	Yamaha RX-A6A
----------------------	---------------

Full in-room calibration and level matching on commissioning.

BRAND STORY

M&K Sound

Miller & Kreisel created the powered subwoofer and the satellite-sub system in Los Angeles in 1974 – and their monitors became the reference in the dubbing stages where films are actually mixed.

Films, series and games are mixed on MK Sound monitors every day. Choosing MK for your cinema means the soundtrack plays back on the same voicing it was created on – dialogue, dynamics and detail exactly as the mixer intended.

Precise imaging, high dynamic capability and push-pull dual-driver subwoofers are the MK signature – engineered for reference level in real rooms, not just the lab.

FOUNDED

1974 · Los Angeles, California

HERITAGE

Studio monitor reference – THX pioneer

SIGNATURE

Push-pull dual-driver subwoofers · precise imaging

IN YOUR CINEMA

Loudspeaker package across the channel groups

THE DETAIL

- Aesthetic proposal for the cinema interior only – refer to the main cinema design plans for the technical room specification.
- This board is an indicative design direction prepared from the Sonor aesthetic library. Final fabrics, finishes and fittings are confirmed on sample approval and formal quotation.
- Pricing for aesthetic elements is carried on the main cinema proposal, not this document.
- Fabric batches and photographic reproduction can vary – physical samples are provided before order. E&OE.
